

Advantages of Solids

CaterSafe was one of the first companies in Ireland to supply a full range of detergents including the newest solid technology. In 2004 we took this a step further with the introduction of an expanded line of solid products and dispensers and we still offer the widest range of solid detergents available in Ireland.

Teamed with Sunburst Chemicals Inc, one of the leading manufacturers of solid detergents and systems in the world we bring you all the advantages of The Solid Revolution.

The Benefits of Solids

Better Products:

Due to unique manufacturing processes, the most effective blend of ingredients can be used, allowing for easier lifting and dissolving of soils on contact.

Lower Costs:

With unique dispensing systems and product ingredients, each container produces more use solution than Liquid and Powder equivalents.

Controlled Usage:

Solid Products can only be dispensed and diluted using specialist dispensing equipment, removing the risk of over- use associated with free pouring and hand mixing.

Improved Safety:

Solid Detergents are the safest form of detergents available. Solids cannot be spilled, splashed or mixed by hand, greatly reducing the potential for employee contact with chemicals.

Reduced Storage:

Higher concentrations mean less chemical is required to do the same job. This delivers huge savings on the limited storage space available within most commercial kitchens.

Cost Savings

Our range of Solid Chemicals can bring significant cash savings if used as a complete range. The complete range includes all primary chemicals required within any large scale commercial kitchen.

Cost Savings over liquids & powders;

- | | |
|-------------------------|----------|
| • Dishwash Detergents | 15-25% |
| • Rinse Aid | 15 – 25% |
| • Pot & Pan | 20% |
| • Degreaser & Sanitiser | 30 – 50% |

Better for Environment

When it comes to protecting the environment, our solids offer many advantages:

- Solids' 100% concentrate reduces container size. Solids' containers use the least grams of plastic per volume of use solution in the industry.
- Empty means empty No chemical residue left in the container to end up in landfills.
No rinsing required so no wasted water and nothing down the drain.
- Containers are Class 2 recyclable.

Environmentally-responsible solutions must consider the complete picture, including operational efficiencies and energy usage. Our solids offer energy savings by:

- Reducing fuel consumption for freight and delivery - solids take up less space, which requires fewer trucks to ship them.
- Reducing heat required for transport and storage, because solids will not freeze or thaw.

The Solid Range

Solid Dishwash Detergent (Performance)	Removes heavy food soils fast and effectively, strips stains off dishes and cuts coffee stains on contact. This highly active, powerful detergent provides lower use cost and superior effectiveness in hard water resulting in clear, spot-free dishware.
Solid Rinse Aid	A 100% concentrated solid rinse agent that provides the ultimate in performance and cost effectiveness in all applications. CaterSafe Solid Rinse's sheeting action inhibits the formation of water spots and is effective in all water conditions.
Solid Alu Safe Detergent	An aluminum safe, highly concentrated and defoamed solid warewashing detergent that powers off soil. Alu Safe's unique formula has metal protection properties that will not discolor or attack aluminum or soften metals, but leaves them clean and bright.
Solid Pot & Pan (manual wash)	A mild, yet high sudsing pot and pan/manual dishwashing detergent. Excellent performance in all water conditions. Pleasant scent. Recognized by the US EPA'S " Design for the Environment " program as a step forward in improving the safety and environmental impact of cleaning products.
Solid Multi-Purpose Degreaser	A mild, non-caustic degreaser that emulsifies heavy loads of unburned grease and oil without the hazards of caustic. Recognized by the US EPA'S " Design for the Environment " program as a step forward in improving the safety and environmental impact of cleaning products
Solid Multi-Surface Sanitiser	An effective multipurpose, no-rinse sanitizer. Recommended for use in food handling areas, hospitals, nursing homes, medical offices, schools, childcare centres, hotels, motels and office buildings.
